

## **Verbena lilacina 'De La Mina'**

Baja California Verbena

Sub shrub

Sun

Moderate water

Origin: California

Purple, delicate flowers and a fine cut light green foliage make a beautiful display in winter and spring. Established plants grow three feet high and four wide and require only occasional watering and little care. Use this plant for natural settings and combine with other natives and Mediterranean plants as filler, for borders, on slopes or in mass. Trim young plants to encourage fullness. Trim mature plants in periods of active growth.
